SUMMARY

AI Engineer with 1.5+ years shipping production LLM systems in Python — real-time voice agents, MCP servers, multi-agent workflows and RAG pipelines, running on FastAPI, PostgreSQL and AWS. Own features end to end, from design through deployment and production debugging. Open-source contributor to OpenMontage (50k+ stars).

TECHNICAL SKILLS

Languages & Core Python, SQL, OOP, Git, GitHub, Linux, Docker

AI & Machine Learning LLMs, Generative AI, Prompt Engineering, RAG Pipelines, OpenAI Agents SDK, OpenAI Realtime API, Model Context Protocol (MCP), Multi-Agent Architectures, LangChain, LLM Observability & Tracing (Langfuse, OpenTelemetry), Conversational & Voice AI, NumPy, Pandas, scikit-learn, PyTorch

Vector & Data Stores Qdrant, Pinecone, PostgreSQL, MySQL, Oracle Database, SQLAlchemy

Backend & Integrations FastAPI, Flask, REST APIs, WebSockets, Twilio, WhatsApp Business API

Cloud & Operations AWS (Lambda, S3, RDS, IAM, Secrets Manager, CloudWatch), Oracle Cloud Infrastructure (OCI), logging and monitoring

EXPERIENCE

Wappnet Systems Pvt. Ltd. — Gujarat, India

Associate AI Engineer

Jun 2025 – Present

Promoted from AI/ML Intern after six months.

- Built a video generation system producing themed long-form videos (up to 45 minutes) for multiple YouTube channels, matching each channel's format and tone. In active real-world use.
- Built a real-time voice agent for customer support on the OpenAI Realtime API, streaming bidirectional audio between Twilio telephony and the model over FastAPI websockets.
- Built MCP servers exposing internal business systems as agent-callable tools, usable from any MCP client including Claude Code and Codex.
- Shipped multi-agent workflows with tool use and contextual reasoning across internal business functions, including automated research and reporting.
- Built RAG pipelines over 500+ enterprise documents using the OpenAI Agents SDK and Qdrant for internal search and knowledge retrieval.
- Built WhatsApp and web chat integrations for business sites, connecting customer conversations to internal systems.
- Design and deploy FastAPI + PostgreSQL services on AWS (Lambda, S3, RDS, IAM, Secrets Manager, CloudWatch); established reusable logging and monitoring patterns across services.

AI/ML Intern

Jan 2025 – Jun 2025

- Built a recommendation system in Python for an enterprise client application.
- Deployed applications on Oracle Cloud Infrastructure (OCI) and worked with Oracle Database as the backing data store.
- Worked alongside senior engineers on enterprise AI architecture, code review and deployment workflows — progressing to production ownership within six months.

OPEN SOURCE

OpenMontage — [calesthio/OpenMontage](https://github.com/alesthio/OpenMontage) (50k+ stars, AGPL-3.0)

Jun 2026

- Fixed an agent skill-loading bug (missing YAML frontmatter, kebab/snake-case mismatch) that broke skill resolution in a system built on the framework — [Issue #192](#). Contributed as github.com/harshdadiya-wappnet.

EDUCATION

A D Patel Institute of Technology, CVM University

2021 – 2025

B.E., Information Technology — CGPA 8.14 / 10 • Minor Degree, Internet of Things — CGPA 7.56 / 10
