

HARSH DADIYA

AI Engineer | Data Scientist

harshdadiya@gmail.com | +91 7096660010 | Gujarat, India | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

AI Engineer with hands-on experience designing, deploying, and scaling enterprise AI systems, multi-agent architectures, cloud-native applications, and workflow automation platforms. Specialized in building production-grade AI solutions leveraging large language models, agent frameworks, MCP-based integrations, retrieval systems, and real-time conversational AI. Proven expertise in Anthropic-managed agents, Agent SDKs, AI workflow orchestration, and enterprise-grade automation that improves operational efficiency and business productivity.

TECHNICAL SKILLS

AI & LLM	Anthropic Claude, Claude Sonnet 4.6, Opus 4.x models, GPT-4, GPT Realtime Models Agent SDKs, Multi-Agent Systems, Function Calling, Tool Use Architectures RAG Pipelines, Prompt Engineering, Semantic Search, Vector Search
Cloud & Infra	AWS: EC2, Lambda, API Gateway, RDS (PostgreSQL), DynamoDB, S3, CloudWatch, SQS Secrets Manager, IAM, VPC Architecture, CI/CD Pipelines, Containerized Deployments
Backend	Python, FastAPI, Django, PostgreSQL, REST APIs, WebSockets, Async Programming, Microservices
Integrations	Twilio, MCP Servers, OAuth

PROFESSIONAL EXPERIENCE

Associate AI Engineer

Wappnet Systems Pvt. Ltd. | Gujarat, India

June 2025 – Present

- Designed and deployed production-grade AI systems leveraging Anthropic and OpenAI ecosystems, enabling intelligent automation across multiple business functions.
- Architected multi-agent workflows capable of autonomous task execution, contextual reasoning, tool usage, and enterprise system interactions.
- Developed scalable cloud-native AI services using FastAPI and PostgreSQL, deployed on AWS infrastructure including IAM, Secrets Manager, Lambda, S3, RDS, and CloudWatch.
- Built and maintained MCP-based integrations connecting AI agents with enterprise applications and internal business systems.
- Led development of enterprise knowledge management and retrieval systems supporting intelligent search and decision-making.
- Designed real-time conversational AI platforms supporting voice, chat, and omnichannel customer interactions.
- Established reusable AI service frameworks along with observability and monitoring practices to streamline deployment and maintain production reliability.

AI/ML Intern

Wappnet Systems Pvt. Ltd. | Gujarat, India

January 2025 – June 2025

- Gained hands-on experience in machine learning and deep learning applications.

- Contributed to development of AI-driven solutions and learned production-level implementation.
- Worked closely with senior engineers to understand enterprise AI architecture and best practices.
- Demonstrated strong technical skills and problem-solving ability, leading to promotion to Associate AI Engineer.

PROJECTS

Real-Time Voice Agent Platform

Technologies: Python, GPT Realtime, Twilio, AWS EC2, WebSockets, FastAPI, PostgreSQL

Production-ready conversational voice AI platform handling real-time telephony interactions and intelligent voice-based workflows at scale.

- Developed real-time voice agents using GPT Realtime models integrated with Twilio telephony for inbound and outbound interactions.
- Implemented low-latency WebSocket streaming architecture supporting real-time voice processing and event handling.
- Deployed and managed production environments on AWS EC2 with scalable voice orchestration workflows for customer service.
- Integrated with an existing pharmacy management system for synchronized operations.

Cure Now — Intelligent Medical Chatbot

Technologies: Python, Flask, Google Gemini AI, LangChain, Pinecone, Hugging Face

- Developed an AI-powered medical chatbot leveraging Google's Gemini AI for accurate health information delivery.
- Implemented vector similarity search using Pinecone for efficient medical knowledge base retrieval.
- Integrated LangChain framework for advanced natural language processing and response generation.
- Created an intuitive web interface providing real-time responses to health-related queries.

SQL Agent Tool — Natural Language to SQL Converter

Technologies: Python, SQLAlchemy, Multiple LLM APIs (Groq, OpenAI, Gemini, DeepSeek), PostgreSQL

- Built an intelligent SQL query agent converting natural language queries into executable SQL statements.
- Integrated multiple LLM providers for flexible AI processing and enhanced query accuracy.
- Implemented robust database schema reflection and safe query execution with parameter binding.
- Developed a comprehensive CLI interface with an interactive shell for seamless database interactions.

EDUCATION

Bachelor of Engineering — Information Technology

A D Patel Institute of Technology

CGPA: 8.14 / 10

2021 – 2025

Minor Degree — Internet of Things

A D Patel Institute of Technology

CGPA: 7.56 / 10

2022 – 2024

Higher Secondary Education (Science)

Shree Swaminarayan English Medium School

Percentage: 87.8%

2019 – 2021

CERTIFICATIONS & ACHIEVEMENTS

- Code Unnati Innovation Marathon — SAP India & Edunet Foundation (Advanced AI/ML Program).
- SSIP Hackathon Participant — Gujarat State Innovation Program.

- HackerRank Certified — Python Programming and Data Structures.
- Active contributor to open-source AI/ML projects on GitHub.
