SUMMARY

AI Engineer with 1.5+ years shipping production LLM systems in Python — real-time voice agents, MCP servers, multi-agent workflows and RAG pipelines, running on FastAPI, PostgreSQL and AWS. Own features end to end, from design through deployment and production debugging.

TECHNICAL SKILLS

Languages & Core Python, SQL, OOP, Git, GitHub, Linux, Docker

AI & Machine Learning LLMs, Generative AI, Prompt Engineering, RAG Pipelines, OpenAI Agents SDK, OpenAI Realtime API, Model Context Protocol (MCP), Multi-Agent Architectures, LangChain, LLM Observability & Tracing (Langfuse, OpenTelemetry), Conversational & Voice AI

Vector & Data Stores Qdrant, Pinecone, PostgreSQL, MySQL, Oracle Database, SQLAlchemy

Backend & Integrations FastAPI, Flask, REST APIs, WebSockets, Twilio, WhatsApp Business API

Cloud & Operations AWS (Lambda, S3, RDS, IAM, Secrets Manager, CloudWatch), Oracle Cloud Infrastructure (OCI), logging and monitoring

EXPERIENCE

Wappnet Systems Pvt. Ltd. — Gujarat, India

Associate AI Engineer

Jul 2025 – Present

Promoted from AI/ML Intern after six months.

- Built a video generation system producing themed long-form videos (up to 45 minutes) for multiple YouTube channels, matching each channel's format and tone — 49 videos published to date, in active production use.
- Built a real-time voice agent for customer support on the OpenAI Realtime API, streaming bidirectional audio between Twilio telephony and the model over FastAPI websockets — handling 1,000+ calls per day.
- Built MCP servers exposing internal business systems as agent-callable tools, usable from any MCP client including Claude Code and Codex.
- Shipped multi-agent workflows with tool use and contextual reasoning across internal business functions, including automated research and reporting.
- Built RAG pipelines over 500+ enterprise documents using the OpenAI Agents SDK and Qdrant for internal search and knowledge retrieval.
- Built an AI chat service for client business sites, with conversation tracking, usage analytics, and abuse controls including IP-based rate limiting that blocks addresses registering more than five accounts.
- Built a WhatsApp sales agent that answers product and portal queries and routes customers to the relevant product page.
- Design and deploy FastAPI + PostgreSQL services on AWS (Lambda, S3, RDS, IAM, Secrets Manager, CloudWatch); established reusable logging and monitoring patterns across services.

AI/ML Intern

Jan 2025 – Jul 2025

- Built a recommendation system in Python for an enterprise client application.
- Deployed applications on Oracle Cloud Infrastructure (OCI) and worked with Oracle Database as the backing data store.

OPEN SOURCE

OpenMontage — [calesthio/OpenMontage](https://calesthio.com/OpenMontage) (AGPL-3.0)

Jun 2026

- Diagnosed and fixed a skill-resolution bug (missing YAML frontmatter, kebab/snake-case mismatch) that broke agent skill loading in a system built on the framework — [Issue #192](#). Contributed as github.com/harshdadiya-wappnet.

WRITING

Technical articles on AI engineering, agent architectures and developer tooling, published in Python in Plain English, Stackademic and Level Up Coding — including “My Hands-On Journey with Model Context Protocol (MCP).” Archive at medium.com/@harshdadiya.

EDUCATION

A D Patel Institute of Technology, CVM University

2021 – 2025

B.E., Information Technology — CGPA 8.14 / 10 • Minor Degree, Internet of Things — CGPA 7.56 / 10
